

Fibria is selected for the 2011 ISE portfolio – BM&FBovespa Corporate Sustainability Index

São Paulo, November 25, 2010 – Fibria has once again been chosen for the list of companies comprising the BM&FBovespa Corporate Sustainability Index (ISE). This index brings together companies whose shares are listed at the São Paulo Stock Exchange and that demonstrate a high level of commitment to best practices in the areas of sustainability and corporate governance.

This selection process is carried out in partnership with the Center for Sustainability Studies (GVCes), part of the Getúlio Vargas Foundation's School of Business Administration in São Paulo (FGV-EAESP). The assessment is based on achieving a balance between economic growth, social responsibility and environmental performance.

This sixth edition of the ISE portfolio will be valid as of January 3, 2011 and contains 38 listed companies, four more than the previous one.

In addition to inclusion in the ISE BOVESPA portfolio, Fibria has also recently been selected for the 2010/2011 edition of the New York Stock Exchange's Dow Jones Sustainability Index World (DJSI World), which highlights the companies worldwide with the best corporate sustainability practices.

Both indexes reinforce the company's commitment to creating economic value with responsible performance in the socio-environmental sphere.
